TECHNICAL PROJECTS

SkillFrameX – Online Learning Platform | Frontend Developer

Jan 2026 – March 2026

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Data Visualization (Charts)

GitHub: <https://github.com/Lepidocodie/SkillFrameX---V2>

- **Engineered a modern, SEO-optimized Learning Management System (LMS)** using Next.js (App Router), TypeScript, and a scalable Tailwind CSS architecture with robust reusable components.
- **Architected dynamic course consumption flows and modular API integrations**, utilizing nested routing and custom React hooks (useProgress) to enable real-time progress tracking and automated certificate generation.
- **Developed interactive user dashboards integrating data visualization** (Activity and Topic Pie Charts) to effectively monitor and display individual learning behaviors and progress.

SALTY v2 – E-commerce | Full Stack Developer

Dec 2025 – April 2026

Tech Stack: Full-Stack Developer Tech Stack: Nuxt 3, Node.js, Express.js, Prisma, MySQL, MongoDB, Docker, Nginx, AWS EC2, GitHub Actions (CI/CD)

GitHub: <https://github.com/Lepidocodie/SALTY-FullStack>

- **Engineered a comprehensive full-stack E-Commerce platform** utilizing Nuxt 3 and Node.js, implementing secure role-based access control (RBAC) with JWT for Admin, Seller, and Buyer experiences.
- **Architected a high-performance dual-database ecosystem**, using MySQL (Prisma ORM) for core transactional data and MongoDB (Mongoose) for scalable application activity logging.
- **Streamlined deployment processes** by building an automated CI/CD pipeline via GitHub Actions, securely injecting environment variables via Secrets and deploying seamlessly to AWS EC2.
- **Spearheaded infrastructure containerization** using Docker Compose and optimized server security by configuring a Nginx reverse proxy for precise HTTPS traffic routing.
